

# HIPAA RISK ASSESSMENT

The HIPAA Risk Assessment is a three-day gap assessment and risk workshop that satisfies the HIPAA Security Rule requirement to perform a risk assessment. It ensures compliance with the regulations and expectations of business partners and customers. It is foundational in developing a cybersecurity strategy where budgetary priorities are made in alignment with the value and risks of the business.

The HIPAA Risk Assessment with GreyCastle Security's expertise and proven processes help address common issues of ownership and remediation and provide clear solutions.

## What's Included

### Top 10 Risks Review

Discover critical, business-focused gaps in people, process, and technology quantified in terms of impact on the business's revenue and reputation. Your top 10 risks will be highlighted with detailed findings and recommendations.

### Corrective Action Plan

Your corrective action plan (CAP) focuses on your top 10 risks and addresses the gaps around people, processes, and technology. CAPs are high-level strategies with key tasks and outcomes which allow formal tracking of timing, budget, resources, and status.

### Cyber Role Clarity, Risk Ownership & Governance

Align your business units and the respective responsibilities and associated risks of common departments (HR, Finance, Legal, Ops, etc.), clarify ownership and who provides remediation.

## AT A GLANCE

- **Pre-populated interview schedules** for easier scheduling, better output.
- **Expert-led interviews** ensure accurate, meaningful assessment results.
- **Executive-level findings reports** in easy-to-understand language.
- **Pre-populated CAP** with trackable, executable, compliant processes.
- **Findings presentation** from GreyCastle Security to your senior executives.

## Why GreyCastle Security for HIPAA Risk Assessments?

- **Pre-populated interview schedules and organized interviews** in a productive 3-day workshop.
